Northwind Robotics - Q3 2026 Financial Report

Executive Summary

Northwind Robotics delivered total revenue of $31.4 million in Q3 2026, up 22% year over year. Growth was driven primarily by Atlas-7 fleet orders in the West region. Operating expenses grew more slowly than revenue, improving operating margin to 9.1% from 5.8% in Q3 2025. The company ended the quarter with 214 full-time employees, up from 168 a year earlier.

Revenue by Region

Region	Q3 2026 Revenue	Q3 2025 Revenue	YoY Growth
West	$14.2M	$10.5M	+35%
Northeast	$7.8M	$7.1M	+10%
Midwest	$5.1M	$4.6M	+11%
Europe	$3.6M	$2.5M	+44%
Asia-Pacific	$0.7M	$0.4M	+75%

Total Q3 2026 revenue: $31.4 million

Operating Expenses

Category	Q3 2026	Q3 2025
R&D	$9.8M	$8.1M
Sales & Marketing	$5.2M	$4.4M
General & Administrative	$4.1M	$3.6M
Manufacturing overhead	$6.0M	$5.3M

Headcount and Hiring

Northwind Robotics ended Q3 2026 with 214 full-time employees, compared to 168 at the end of Q3 2025. Most new hires joined the Austin engineering office, which grew from 28 to 40 engineers during the quarter as part of the Falcon-3 program ramp-up.

Q4 2026 Outlook

For Q4 2026, Northwind Robotics expects revenue in the range of $34 million to $37 million, driven by the initial production ramp of the Falcon-3 inspection drone and continued Atlas-7 fleet expansion in the West region. The company expects operating margin to remain between 8% and 10% as manufacturing overhead scales with the new Portland production line coming online in November 2026.
